

# Klaus Rossler Photography - Fine Art Prints

## Photo-Restoration

Damage of your valuable family photos can consist of:

- **Deterioration through age and sunlight: unnatural colour casts, fading, loss of detail**
  - **Foreign matter: writing and pencil marks, coffee and other stains, mold**
  - **Physical damage: scratches, cracks, ripped into several pieces**

In most cases, all of the above is repairable, but requires different methods and can take up several hours of work.

Foreign matter and physical damage is removed manually with a digital pen and tablet. Under high magnification, damaged areas are replaced with samples of neighboring, intact areas and an exact match in colour and texture is achieved.

**Basic adjustments applied to every image are:  
Contrast, Colour (Hue / Saturation), Sharpening**

Please note - proper restoration can be limited or not possible if:

- the photograph was originally taken out-of-focus or blurry,
- the image is so over- or under exposed that there is not enough visible information to work with

To be able to achieve the highest possible image resolution to work with, and subsequently, for the resulting quality of the final print, this process requires a high resolution scan made on professional equipment.

**Therefore the original photograph is required -  
in form of either print, negative or transparency (slide).**

Your original will be returned untouched. Instead, a new print will be made, which allows being of a convenient size - to fit standard frames, avoiding costly custom-framing.

These high quality prints, also known as Giclée-Prints, are made with the same archival-quality materials as my Fine Art-Prints, guaranteed to resist yellowing and fading in excess of 100 years.

Black & White images can be neutral, sepia or hand-coloured, preserving or adding an antique appearance. Various borders and inscriptions are possible.

A digital version for sharing or for your digital photo album is always included.

**I will provide you by e-mail with samples and variations - for viewing and your approval - before making the final print.**

Finished prints are delivered in crystal clear sleeves and on backing material, for protection and proper presentation.

**Please contact me for further details.**

other services offered:

custom photography, private / commercial  
transfer to digital - of prints, slides, negatives  
creation of slide shows  
editing and preparation for reproduction and commercial use
